

FO patch panel extendable OVA 19" 1U

FO patch panel extendable with quick lock and exchangeable front panel for up to 48 fibers. For SC / LC and E2000® couplings the front panel is also supplied with screw holes in order to affix couplings. The extendible depth of 200mm ensures comfortable access to the couplings. The box can also be offset by 40mm towards the rear. Cable entry is effected via a maximum of two cable glands or a fixture for break-out cable (each sold separately as special accessory). A breakout point is located on both sides on the back and serves as a holder for the FODH / FOCT distributor system.

- Full metal design
- 40 mm offsetable towards rear
- Powder coated, color RAL 7035
- Cover: metallic luster
- Centered bolt for attaching up to 4 splice cassettes
- Dimensions (HxWxD): 44.45 x 483 x 230 mm
- Weight: 2.7 kg
- When open, the box can be tilted downwards.
