

# H.D.S. Module carrier 19" 4U for 8 modular splice distribution boxes

## H.D.S. module carrier

The H.D.S. module carrier can be equipped with modules, as required, from the front or the rear. The modules are anchored safely in the module carrier using a snap-in lock. The cumbersome screw-in is not required. The incoming and outgoing cables can be fed comfortably through strain-relief rails. Despite the high packing density, a later expansion is possible at any time due to the modular design.

### Characteristics:

Material	Steel sheet zinc coated powder coated
Color	gray, RAL 7035 cover; metallic glossy
Dimensions	19" 4U H.D.S. module carriers for 8 modular splice distributors in a 19" data cabinet
Module feed	both sides (front and rear mounting possible)
Module fastening	8 slots, module in snap-in fastening

## H.D.S. module slide-in

The H.D.S. modular splice distribution box 19" 4U 10HP has been developed for the installation in 19" 4U module carriers. The splice distributors are pre-equipped with 6 splice cassettes. 12 splices are provided for each splice cassette. The cassettes are installed to be browsed. The modules can be slid in the 4U module carrier from the front or the rear. When fully equipped, 8 modules can be installed in a 19" 4U module receptacle, therefore 576 splice connections on 19" 4U are possible.
